SAICE is an ECSA Approved CPD Service Provider

Presented By: SAICE Volunteers

Fully On-Line

Empower Your Career. Protect Your Wellbeing. Lead with Confidence.

In the high-pressure world of engineering, technical expertise is only half the battle. Navigating complex workplace dynamics and identifying toxic leadership is crucial for your long-term professional success and mental health.

As a young professional, you are the future of the industry. However, the transition from technical training to corporate environments can expose you to manipulative management tactics that undermine your confidence and stall your progression.

This insightful course, *"Mastering Soft Skills for Engineering Professionals: Breaking Free – Recognizing & Responding to Manipulative Management,"* brought to you by SAICE Academy, provides the tools you need to thrive.

What You Will Learn

Identify Toxic Patterns: Recognize the 7 most common manipulative phrases used by toxic bosses to maintain control.

Master Effective Responses: Learn professional, empowered ways to respond to gaslighting, guilt-tripping, and unfair pressure.

Protect Your Wellbeing: Strategies for documenting interactions, building support networks, and maintaining healthy work-life boundaries.

Strategic Career Planning: How to plan an exit strategy and find environments where your talent is respected and nurtured.
